## Overview of findings and recommendations

To save you time when assessing the report, we only provide maps and data tables of features within the search radius that we have identified to be of note. These relate to environmental risks that may have liability implications, affect insurance premiums, property values and/or a lender's willingness to lend.

You can view the fully comprehensive library of information we have searched on [page 13 >](#).

### Contaminated Land

The property has passed Groundsure's Contaminated Land Liability assessment. Historical land uses (detailed in the Contaminated Land section of this report) may necessitate further assessment should the property be developed. The Local Planning Authority may formally request this through planning conditions. Occupation and enjoyment of the property for ongoing, continued use should not be affected.

### Ground stability

The property is indicated to lie within an area that could be affected by infilled land. You should consider the following:

#### Next steps for consideration:

- if a survey has been undertaken at the property that considers ground instability and no issues were found, no further action is required
- however, based on the findings of this report, the purchaser should be encouraged to consider potential instability in any future development or alteration of the ground including planting and removing trees, and regardless of the survey outcome
- if no survey has yet been undertaken, we recommend one is carried out by a suitably qualified and experienced person
- if ground instability issues have been or are subsequently identified in a survey we recommend following any advice given in the survey findings
- you should also check whether the property benefits from a current NHBC guarantee or other environmental warranty that often covers structural issues. Please note the presence of an NHBC guarantee wouldn't change the risk assessment of this report

## Non-coal mining areas

The property is assessed to be in a non-coal mining area.

### Next steps for consideration:

- A more detailed mining search may further clarify the potential risks presented in this report, and unearth records not available to your surveyor. Groundsure GeoRisk can provide a comprehensive assessment of all mining risks and can be ordered through Groundsure or your preferred search provider

## Other considerations

No additional factors that Groundsure believe require further action have been identified in relation to the property.

## Environmental summary

Environmental searches are designed to ensure that significant hazards and risks associated with this property are identified and considered alongside the investment in or purchase of a property.

Please see [page 2](#) > for further advice.

### Contaminated Land

Our Contaminated Land searches have found some potential contamination risks, although these are not considered to be significant under Contaminated Land legislation. If any part of the site was to be (re)developed it is possible that you might have to investigate the presence of contamination from these land uses further.

Please see [page 5](#) > for details of the identified issues and [Click here](#) ↗ for our assessment methodology.

**Contaminated Land Liability** **Passed**

**Past Land Use** **Identified**

**Waste and Landfill** **Passed**

**Current and Recent Industrial** **Passed**

### Flooding

No significant concerns have been identified as a result of the flood risk searches. No action required.

[Click here](#) ↗ for further explanation of the flood risk assessment.

**River and Coastal Flooding** **Very Low**

**Groundwater Flooding** **Low**

**Surface Water Flooding** **Negligible**

**Past Flooding** **Not identified**

**Flood Storage Areas** **Not identified**

**FloodScore™ insurance rating** **Very Low**

Compiled by Ambiental, a leading flood risk analysis company. [Click here](#) ↗ for details.

### Ground stability

The property is assessed to have potential for natural or non-natural ground subsidence.

Please see [page 6](#) > for details of the identified issues.

**Natural Ground Stability** **Low**

**Non-Natural Ground Stability** **Identified**

### Radon

Local levels of radon are considered normal. However, if an underground room makes up part of the accommodation, the property should be tested regardless of radon Affected Area status.

**Not in a radon affected area**

Former industrial land uses

© Crown copyright and database rights 2025. Ordnance Survey licence 100035207

**Former industrial land use (1:10,560 and 1:10,000 scale)**

These historical land uses have been identified from 1:10,560 and 1:10,000 scale Ordnance Survey maps dated from the mid to late 1800s to recent times. They have the potential to have caused ground contamination. Please see the Environmental Summary to find out how these could impact the site.

Please see [page 2 >](#) for further advice.

**Ground stability / Non-natural ground subsidence**

**— Site Outline**

Search buffers in metres (m)

**■ Infilled Land**

**Mining hazards:**

**■ Highly likely**

**■ Likely**

**Non-coal mining areas**

The property is located in an area that may be affected by surface or sub-surface mining of materials other than coal. Mining may cause ground stability problems such as subsidence, surface collapses, mass movement and landslides, depending on the style of mining used.

Please see [page 2 >](#) for further advice.

**Infilled land**

Maps suggest the property is located near a previous pond, quarry, mine, landfill or other hole in the land. These land cavities are often filled with various materials, and this can cause structural problems. Groundsure's experts recommend that you check whether your structural surveys have taken this into account.

Please see [page 2 >](#) for further advice.

Distance	Direction	Use	Date
7 m	E	Unspecified Heap	1952

Groundsure's experts systematically analyse historical maps, which can highlight areas that, over time, may have been filled with various materials. The materials used are usually safe, although in some cases contaminative materials may also have been used. Past ground workings have been identified at the site. These workings may be associated with railway cuttings or other ground engineering but may also indicate mining activity. Information is taken from features identified on Ordnance Survey historical maps, which do not indicate the distance or direction that mines extend beneath the surface. For example, features such as mine shafts only indicate the entrance to a mine. From this, we may infer the potential for underground features to extend outward from this point. Some features within this database may also relate to non-mining underground activities e.g. air shafts for underground railways.

## Energy summary

The property has been identified to lie within 5km of one or more solar energy features or within 10km of one or more wind energy features.

If required, full details on these energy features including a detailed location plan relative to the property are available when you purchase a Groundsure Energy and Transportation Report via your preferred searches provider.

### Oil and gas

No historical, active or planned wells or extraction areas have been identified near the property.

**Oil and gas areas**  
**Oil and gas wells**

**Not identified**

## Transportation summary

The property has not been identified to lie within the specified distance of one or more of the transportation features detailed below.

If required, full details on these transportation features including a detailed location plan relative to the property are available when you purchase a Groundsure Energy and Transportation Report via your preferred searches provider.

### HS2

No results for Phase 1 or Phase 2 of the HS2 project (including the 2016 amendments) have been identified within 5km of the property. However, HS2 routes are still under consultation and exact alignments may change in the future.

Visual assessments are only provided by Groundsure if the property is within 2km of Phase 1 and 2a. Other assessments may be available from HS2.

<b>HS2 Route</b>	Not identified
<b>HS2 Safeguarding</b>	Not identified
<b>HS2 Stations</b>	Not identified

### Other Railways

The property is not within 250 metres of any active or former railways, subway lines, DLR lines, subway stations or railway stations.

<b>Active Railways and Tunnels</b>	Not identified
<b>Historical Railways and Tunnels</b>	Not identified
<b>Railway and Tube Stations</b>	Not identified
<b>Underground</b>	Not identified

## Planning summary

### Planning Applications

Using Local Authority planning information supplied and processed by Serac Tech dating back 7 years, this information is designed to help you understand possible changes to the area around the property. Please note that even successful applications may not have been constructed and new applications for a site can be made if a previous one has failed. We advise that you use this information in conjunction with a visit to the property and seek further expert advice if you are concerned or considering development yourself.

### 83 Total applications

This total includes mixed and commercial developments within 750m, large residential within 750m, medium residential within 500m, small residential within 250m and home improvement applications within 250m. If required, full details on these applications including a detailed location plan relative to the property are available when you purchase a Groundsure Planning Report via your preferred searches provider.

### Planning constraints

Protected areas have been identified within 50 metres of the property.

Please see [page 11](#) > for details of the identified issues.

**Environmental Protected Areas** Not identified  
**Visual and Cultural Protected Areas** **Identified**

### Conservation Areas

Conservation Areas exist to protect special architecture and historic interest in an area. It may mean that the property is located in or close to a beautiful or architecturally interesting place to live. There may be extra planning controls restricting some development. This particularly applies to developing the outside of the building and any trees at the property.

Distance	Direction	Name	District
18 m	S	Framlingham	Suffolk Coastal

This data is sourced from Historic England and Local Authorities. For more information please see [historicengland.org.uk/listing/what-is-designation/local/conservation-areas/](https://historicengland.org.uk/listing/what-is-designation/local/conservation-areas/).

## Scheduled Monuments

Scheduled Monuments have been officially protected as they are considered of national importance. If you are the owner of a scheduled monument and you wish to carry out works to the monument, you will need to apply for prior written permission from the Secretary of State for Culture, Media and Sport. This applies to works above or below ground level.

Scheduled monuments are not always ancient, or visible above ground. There are over 200 'classes' of monuments, ranging from prehistoric standing stones, through to many types of medieval site - castles, monasteries, abandoned farmsteads - to the more recent results of human activity, such as collieries.

Scheduling is reserved for carefully selected sites, which create a representative sample of sites from different epochs. Please see Historic England's website for further information.

## Methodologies and limitations

Groundsure's methodologies and limitations are available here: [knowledge.groundsure.com/methodologies-and-limitations](https://knowledge.groundsure.com/methodologies-and-limitations) ↗.

## Data providers

Groundsure works with respected data providers to bring you the most relevant and accurate information in your Homescreen report. To find out who they are and their areas of expertise see [www.groundsure.com/sources-reference](https://www.groundsure.com/sources-reference) ↗.

## Conveyancing Information Executive and our terms & conditions

### IMPORTANT CONSUMER PROTECTION INFORMATION

This search has been produced by Groundsure Ltd. Groundsure adheres to the Conveyancing Information Executive Standards.

In addition to The Property Ombudsman (TPO) redress scheme covering consumers, TPO will also provide redress to small businesses (including Charities and Trusts) and where the customer meets the following criteria:

- a small business (or group of companies) with an annual turnover of less than £3 million;
- a charity with an annual income of less than £3 million;
- a Trust with a net asset value of less than £3 million.

### Complaints Advice

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure.

If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Standards.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPOs.

### COMPLAINTS PROCEDURE: If you want to make a complaint, we will:

- acknowledge it within 5 working days of receipt
- normally deal with it fully and provide a final response, in writing, within 20 working days of receipt
- liaise, at your request, with anyone acting formally on your behalf

Complaints should be sent to:

Operations Director, Groundsure Ltd, Nile House, Nile Street, Brighton, BN1 1HW. Tel: 01273 257 755. Email: [info@groundsure.com](mailto:info@groundsure.com)

↗ If you are not satisfied with our final response, or if we exceed the response timescales, you may refer the complaint to The Property Ombudsman scheme (TPOs): Tel: 01722 333306, E-mail: [admin@tpos.co.uk](mailto:admin@tpos.co.uk) ↗ We will co-operate fully with the Ombudsman during an investigation and comply with their final decision.

Groundsure's Terms and Conditions can be viewed here: [www.groundsure.com/terms-and-conditions-april-2023/](https://www.groundsure.com/terms-and-conditions-april-2023/) ↗

All of the advice and reports that Groundsure produces are covered by a comprehensive Remediation Contribution policy to ensure customers are protected, see [www.groundsure.com/remediation](https://www.groundsure.com/remediation) ↗ for full details.
